

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ### Über dieses Buch

Dies ist ein digitales Exemplar eines Buches, das seit Generationen in den Regalen der Bibliotheken aufbewahrt wurde, bevor es von Google im Rahmen eines Projekts, mit dem die Bücher dieser Welt online verfügbar gemacht werden sollen, sorgfältig gescannt wurde.

Das Buch hat das Urheberrecht überdauert und kann nun öffentlich zugänglich gemacht werden. Ein öffentlich zugängliches Buch ist ein Buch, das niemals Urheberrechten unterlag oder bei dem die Schutzfrist des Urheberrechts abgelaufen ist. Ob ein Buch öffentlich zugänglich ist, kann von Land zu Land unterschiedlich sein. Öffentlich zugängliche Bücher sind unser Tor zur Vergangenheit und stellen ein geschichtliches, kulturelles und wissenschaftliches Vermögen dar, das häufig nur schwierig zu entdecken ist.

Gebrauchsspuren, Anmerkungen und andere Randbemerkungen, die im Originalband enthalten sind, finden sich auch in dieser Datei – eine Erinnerung an die lange Reise, die das Buch vom Verleger zu einer Bibliothek und weiter zu Ihnen hinter sich gebracht hat.

### Nutzungsrichtlinien

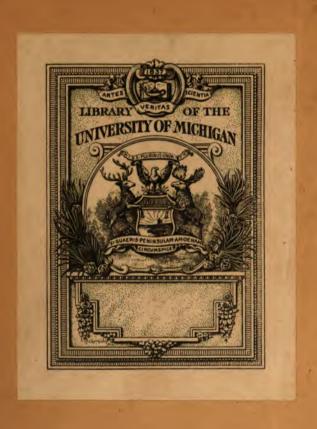

Google ist stolz, mit Bibliotheken in partnerschaftlicher Zusammenarbeit öffentlich zugängliches Material zu digitalisieren und einer breiten Masse zugänglich zu machen. Öffentlich zugängliche Bücher gehören der Öffentlichkeit, und wir sind nur ihre Hüter. Nichtsdestotrotz ist diese Arbeit kostspielig. Um diese Ressource weiterhin zur Verfügung stellen zu können, haben wir Schritte unternommen, um den Missbrauch durch kommerzielle Parteien zu verhindern. Dazu gehören technische Einschränkungen für automatisierte Abfragen.

Wir bitten Sie um Einhaltung folgender Richtlinien:

- + *Nutzung der Dateien zu nichtkommerziellen Zwecken* Wir haben Google Buchsuche für Endanwender konzipiert und möchten, dass Sie diese Dateien nur für persönliche, nichtkommerzielle Zwecke verwenden.
- + *Keine automatisierten Abfragen* Senden Sie keine automatisierten Abfragen irgendwelcher Art an das Google-System. Wenn Sie Recherchen über maschinelle Übersetzung, optische Zeichenerkennung oder andere Bereiche durchführen, in denen der Zugang zu Text in großen Mengen nützlich ist, wenden Sie sich bitte an uns. Wir fördern die Nutzung des öffentlich zugänglichen Materials für diese Zwecke und können Ihnen unter Umständen helfen.
- + Beibehaltung von Google-Markenelementen Das "Wasserzeichen" von Google, das Sie in jeder Datei finden, ist wichtig zur Information über dieses Projekt und hilft den Anwendern weiteres Material über Google Buchsuche zu finden. Bitte entfernen Sie das Wasserzeichen nicht.
- + Bewegen Sie sich innerhalb der Legalität Unabhängig von Ihrem Verwendungszweck müssen Sie sich Ihrer Verantwortung bewusst sein, sicherzustellen, dass Ihre Nutzung legal ist. Gehen Sie nicht davon aus, dass ein Buch, das nach unserem Dafürhalten für Nutzer in den USA öffentlich zugänglich ist, auch für Nutzer in anderen Ländern öffentlich zugänglich ist. Ob ein Buch noch dem Urheberrecht unterliegt, ist von Land zu Land verschieden. Wir können keine Beratung leisten, ob eine bestimmte Nutzung eines bestimmten Buches gesetzlich zulässig ist. Gehen Sie nicht davon aus, dass das Erscheinen eines Buchs in Google Buchsuche bedeutet, dass es in jeder Form und überall auf der Welt verwendet werden kann. Eine Urheberrechtsverletzung kann schwerwiegende Folgen haben.

## Über Google Buchsuche

Das Ziel von Google besteht darin, die weltweiten Informationen zu organisieren und allgemein nutzbar und zugänglich zu machen. Google Buchsuche hilft Lesern dabei, die Bücher dieser Welt zu entdecken, und unterstützt Autoren und Verleger dabei, neue Zielgruppen zu erreichen. ## Vorrede.

Die Berechnung und Zusammenstellung des gegenwärtigen Verzeichnisses ist nach denselben Grundsätzen ausgeführt worden, welche ich bereits in der Vorrede zum Verzeichnisse von 9412 Aequatorial-Sternen (V. Supplementband zu den Annalen der Sternwarte) auseinandergesetzt habe. Demnach sind die angegebenen Sternpositionen blos als provisorisch zu betrachten; jedoch ist durch Beifügung der aus jeder einzelnen Beobachtung abgeleiteten Resultate dafür vorgesorgt, dass künftige Verbesserungen ohne Schwierigkeit in Rechnung gebracht werden können.

Mehrere solche Verbesserungen können jetzt schon angegeben werden: so wird es nöthig sein den Declinationen von Zone 176 eine Correction von — 4",5 beizufügen; eine gleiche Correction ist bei Zone 263 anzubringen, Zone 253 erfordert eine Correction von + 2",3 dann Zone 189 eine Correction von - 1",4 und bei den Zonen 651 und 655 ist wahrscheinlich die Vergleichung der Registrirungsuhr mit der Hauptuhr so angestellt worden, dass die Rectascensionen um ½ Secunde vermindert werden müssen; bei einzelnen Zonen ist zwischen Anfang und Ende eine Aenderung in der Declination eingetreten worüber erst künftige Beobachtungen entscheiden werden und die Folgen der Störung im Registrirungs-Apparate bei Zone 734 lassen sich ebenfalls vorläufig nicht gänzlich beseitigen.

	Das gegenwärtige Verzeichniss enthält:	
	Sterne einmal beobachtet	3115
	Sterne mehrmals beobachtet	3208;
die	Vergleichung mit früheren Beobachtungen weist	nach:
	Sterne die bei Lalande, Bessel, Schjellerup	
:	oder Rümker vorkommen	3038

# Sterne die hier zum erstenmale genauer bestimmt worden sind . . . . . 3285

Als Sterne bei welchen die Vergleichung mit den Katalogen von Lalande und Bessel eine merkliche eigene Bewegung vermuthen läst, sind nicht weniger als 288 Sterne notirt worden, indessen habe ich es vorläufig nicht für nöthig gehalten, das Verzeichniss derselben beizufügen.

Die Vergleichungen mit den Positionen von Lalande und Bessel führt zu Differenzen wie sie bei Zonen-Beobachtungen überhaupt zu erwarten sind; eine sichere Grundlage geben nur die Vergleichungen mit den Positionen von Rümker und Schjellerup, wobei theils eine sehr befriedigende Uebereinstimmung, theils systematische Differenzen sich zeigen, welche bei genauerer Bestimmung der Zonen-Constanten verschwinden werden.

Die Anmerkungen S. 338—364 zeigen, dass eine grosse Menge von Schreib- und Ablesungsfehlern vorgekommen sind, darunter einige systematisch fortgesetzt wie z. B. bei Zone 294 wo es um eine Minute und bei Zone 251 wo es um 10 Secunden gefehlt hat.

Viele von den vorgenommenen Correctionen sind übrigens sehr unsicher und es wird sich ohne Zweifel mit der Zeit herausstellen, dass hie und da Beobachtungen, die durch Aenderung von Minuten oder Secunden als zu einem Sterne gehörend zusammengezogen worden sind, auf verschiedene Sterne sich beziehen, wesshalb ich überall Sorge getragen habe, die Aenderungen genau anzugeben, damit auf das ursprüngliche Beobachtungsresultat direkt zurückgegangen werden kann. Viele Bestimmungen, bei welchen Ablesungs- oder Schreibfehler vorkommen, habe ich vorläufig unverändert gelassen und in den Noten in eckige Klammern eingeschlossen, wodurch zugleich angezeigt werden soll, dass sie bei Bestimmung der Sternposition nicht mitgerechnet wurden.

Die Einrichtung des neuen Verzeichnisses ist ganz dieselbe wie bei dem Verzeichnisse der Aequatorialsterne. Wo derselbe Stern mehrmals beobachtet worden ist, findet man in den Columnen "AR. 1850" und "Decl. 1850" die arithmetischen Mittel der erhaltenen Bestimmungen während in der Note angegeben wird, was man zu diesem Mittel hinzuzufügen (+) oder abzuziehen (-) hat um das Resultat der Beobachtung zu erhalten. Wenn einer Nummer ein Sternchen (\*) beigefügt ist so bedeutet diess, dass bei der Berechnung Anstände sich ergeben haben, worüber in den Anmerkungen das Nähere nachzusehen wäre;

unterdessen haben, nachdem der Katalog selbst gedruckt war, verschiedene Erörterungen stattgefunden, durch welche einerseits früher vorhandene Anstände beseitiget andrerseits neue Anstände erkannt wurden, so dass Sternchen bei einzelnen Nummern überflüssig sind, bei andern Nummern fehlen.

Aehnliche Bewandtniss hat es mit den unter der Rubrik "Bemerkungen" beigefügten Angaben über das Vorkommen der Sterne in den Katalogen von Lalande, Bessel, Rümker, Schjellerup; bei wiederholtem Nachsuchen haben sich nämlich in den eben erwähnten Katalogen Sternpositionen vorgefunden, die früher übersehen worden waren und desshalb im Verzeichnisse nicht angemerkt sind, während in einigen wenigen Fällen bereits angemerkte Sternpositionen jener Kataloge als nicht auf denselben Stern sich beziehend erkannt wurden; bei den Vergleichungen Seite 285—337 kommen keine zur letztern Klasse gehörigen Sterne vor, und von den zur erstern Klasse gehörigen Sternen fehlen nur wenige, die in den "Druckfehlern und Berichtigungen" S. 393—395 sämmtlich notirt sind.

Dem gegenwärtigen Verzeichnisse habe ich S. 371 — 392 Verbesserungen zu dem Verzeichnisse der Aequatorial-Sterne beigefügt und zwar zuerst eine auf einer neuen Bestimmung der Nullpunkte gegründete Berechnung der Declinationen, dann eine Zusammenstellung von Druckfehlern und Berichtigungen, welche bei wiederholter Durchsicht aufgefunden worden sind.

Am Ende findet man die zu dem gegenwärtigen Bande gehörigen Druckfehler und Berichtigungen beigefügt.

München, im Juli 1869.

## Anmerkungen zu dem Sternverzeichnisse

von +3° bis +9°

Die Schnelligkeit womit bei Zonen-Beobachtungen gearbeitet werden muss, hat eine grosse Anzahl von Ablesungs- und Schreibfehlern zur nothwendigen Folge und zwar kommen solche sowohl bei der AR. als bei der Declination vor.

Bei der AR. ist sehr häufig, die folgende, selten die vorausgehende Minute aufgezeichnet worden: Fehler von 1" und 10" sind ziemlich häufig, noch häufiger ist die Verwechslung oder unrichtige Einschreibung der Ordnungszahl der Fäden oder Fadenparthieen, so dass Correctionen von 1, 2, 3, Fadenintervallen angebracht werden müssen; endlich sind bis zur Zone 481 Fehler von 3 bis 4 Secunden bisweilen dadurch entstanden, dass anstatt des Mittelfadens der vorausgehende oder folgende Hülfsfaden genommen wurde.

Die meisten Fehler findet man in den Declinations-Aufzeichnungen, darunter insbesondere Fehler von 10' und 1'; hinsichtlich der Secunden ist zu unterscheiden zwischen den Zonen von Nr. 225 angefangen, wo nur Fehler von 10," hie und da auch von 20", 30" u. s. w. vorkommen können, und den früheren Zonen, in welchen die Ablesung der Unterabtheilungen einer Minute durch eine Micrometer-Schraube geschah; im letztern Falle sind Ablesungsfehler von einem Schraubenumgange (= 100 Schraubentheile = 33",33) ziemlich häufig, und wo eine Beobachtung von den übrigen um 31"—35" abweicht, habe ich überall eine Correction von 100 Schraubentheilen angebracht; aber auch Ablesungsfehler von 10, 20, 30, 40 Schraubentheilen kommen vor, die ich sämmtlich uncorrigirt und in den Mittelwerthen unberücksichtiget gelassen habe, weil die Fehler der Einstellung möglicher Weise bis auf 10 Schraubentheile gehen können und demnach die Correction unsicher bleibt; in den folgenden Anmerkungen habe ich übrigens den muthmasslichen Betrag der Correctionen bei den meisten Sternen angegeben.

Bezüglich auf einzelne Sterne ist Folgendes zu bemerken:

- Nro. 19. AR. um 10" grösser angenommen.
  - 76. Zone 588. AR. um 1' kleiner angenommen.
  - 77. .. 588. AR. um 1' kleiner angenommen.
  - 125. Durch die Verwechslung der Fäden ist die AR unrichtig berechnet worden und muss heissen 9h 45' 40".74.
  - 166. Bei Zone 1d4 oder 165 ein Fehler von 1"
  - 190. Gehört wahrscheinlich zu 189 mit 20" Fehler in AR.
  - 223. Gehört vielleicht zu 225.
  - 233. Zu diesem Sterne wurde aus Versehen vom Anfange der in Zone 166 vorkommende Stern 10h 19' 37", 36 + 4.° 36' 39",1 gezogen unter der Voraussetzung eines Fehlers von 10" in der Declination; später stellte sich diese Voraussetzung als unzulässig heraus; der Stern

Nr. 233 kommt bei Bessel vor mit den Differenzen -0".23 \dagge 2".4; der andere Stern findet sich bei Lalande und Schjellerup mit den Differenzen -0".37 \dagge 5".7 und 0".00 -0".2 Die Vergleichung S. 287 fällt weg.

- Nro. 273. Zone 165. AR. um 1" grösser angenommen.
  - 296. Kommt bei Bessel vor mit einem Fehler von 10" in AR; die Differenzen sind -9".77 +3".1.
  - 325. AR. bei Schjellerup um 1' zu gross.

# Reductions-Elemente der Zonen von $+3^{\circ}$ bis $+9^{\circ}$ Declination von 1841 bis 1864.

Die Theilungsfehler der beiden angewendeten Zonenbögen findet man im Verzeichnisse der Aequatorialsterne (V. Supplementband S. 546) so dass hier nur die Tabellen für die Fadendistanzen und für die Reduction auf den Anfang des Jahres zu berücksichtigen sind.

## A) Fader-Distanzen.

In der ersten Periode bestand das Fadennetz aus 5 einfachen Fäden, in der zweiten Periode aus 5 Systemen zu je 5 Fäden, in der dritten Periode aus 4 Seitensystemen zu 3 und einem Mittelsystem zu 5 Fäden.

### I. Periode von 1841 bis 1849.

Von 1841 bis 1849 befand sich vor und nach dem Mittelfaden III ein Hülfsfaden; die Distanzen waren wie folgt:

Decl.	<ol> <li>Hülfsfaden</li> </ol>	2. Hülfsfaden
30	+ 3.798	3.656

Diese Hülfsfäden wurden nur bei Beobachtung des Polarsternes benützt und werden hier blos desswegen angeführt weil es bei Zonenbeobachtungen öfters vorgekommen ist, dass der eine oder andere davon aus Versehen für den Mittelfaden gehalten und der Durchgang über denselben als Durchgang über den Mittelfaden eingetragen worden ist.

# Verbesserungen zu den Declinationen des "Verzeichnisses von 9412 Aequatorial-Sternen zwischen + 3° und - 3° Declination."

(V. Supplement-Band zu den Annalen der Münchener Sternwarte.)

In der Vorrede zu dem V. Supplement-Bande unserer Annalen ist bereits ausgesprochen worden, dass bei Herstellung des Verzeichnisses der Aequatorial-Sterne nur eine provisorische Bestimmung der Sternörter beabsichtigt war und weitere Grundlagen und Untersuchungen erforderlich sein würden, um einen der Sicherheit der Beobachtungen entsprechenden Grad von Genauigkeit den Resultaten zu geben.

Veranlassung zu neuen Untersuchungen fand ich zunächst in dem Umstande dass von Zone 482 angefangen bei den Declinationen ein kleines Glied der Reduction auf den Anfang des Jahres aus Versehen mit entgegengesetztem Zeichen hinzugefügt worden war; gleichzeitig mit der Verbesserung dieses Versehens hielt ich es für zweckmässig eine ganz neue Bestimmung der Nullpuncte des Zonenbogens und zwar mit Benützung mehrerer Sterne und mit Weglassung des größeren Gewichtes, welches ich ursprünglich den Zonen der späteren Jahre beigelegt hatte, vorzunehmen.

So ist es gekommen, dass die positive Correction, welche fast bei allen Zonen der ersten Jahre angebracht worden war, wegfiel und die Sterne im Allgemeinen etwas südlicher gerückt worden sind; in Folge dessen ist nun auch das Uebergewicht der negativen Differenzen, welches bei Vergleichung mit andern Catalogen hervorgetreten war, verschwunden.

Die Einrichtung der folgenden Tabellen ist sehr einfach; die Columnen enthalten die an die Declinationen anzubringenden Verbesserungen wobei jede Zahl der nicht ein Minus (-) vorangesetzt ist als positiv zu gelten hat; die Nummern der Sterne stehen über den Columnen und in der ersten Columne; und zwar findet man über den Columnen die Hunderte, dann von den zu jeden Hundert gehörigen Einheiten die eine Hälfte (0 bis 49) in der ersten Columne der Seite links, die andere Hälfte (50 bis 99) in der ersten Columne der Seite rechts.

Einzelne Beobachtungen bei welchen man Schreib- oder Ablesungsfehler vermuthen muss, sind bei der neuen Berechnung weggelassen worden: die vorkommenden grösseren Correctionen haben meistens darin ihren Grund.
